**DEPARTMENT OF HIGHER EDUCATION AND TRAINING
DEPARTEMENT VAN HOËR ONDERWYS EN OPLEIDING**

No. 691

31 August 2012

**SKILLS DEVELOPMENT ACT, 1998
LISTING OF OCCUPATIONS AS TRADES FOR WHICH ARTISAN QUALIFICATIONS
ARE REQUIRED**

I, Bonginkosi Emmanuel Nzimande, MP, Minister of Higher Education and Training, hereby issue a definition and criteria to classify an occupation as a trade and a list of trade occupations in terms of Section 26B of the Skills Development Act, 1998 (Act No. 97 of 1998) attached in the schedules 1 and 2 respectively.

DR. B. NZIMANDE, MP

MINISTER OF HIGHER EDUCATION AND TRAINING

DATE: 01/08/12

SCHEDULE 1**Definition and Criteria to Classify an Occupation as a Trade.**

Section 26B of the Skills Development Act indicates that SETAs may apply to the Minister in the prescribed form to include an occupation as a listed trade in the Gazette.

In order to align the inclusion of any such occupation as a trade on the Gazetted list with established skills development planning processes, SETAs will be required to include such an application on the form as prescribed in the procedure of submitting new occupations to the Department for inclusion on the Organizing Framework of Occupations (OFO).

However any occupation that a SETA wants to be included as a trade on the OFO must first be submitted to the National Artisan Moderation Body (NAMB) for evaluation and possible endorsement that the occupation meets the criteria for classification of an occupation as a Trade.

The relevant forms to request new occupations on the OFO have been adjusted to include the submission of such an application by a SETA to NAMB should the SETA wish to do so.

In this regard the Skills Development Amendment Act defines:

- An artisan as “a person who has been certified as competent to perform a listed trade in accordance with the Skills Development Act”
- A trade is “an occupation for which an artisan qualification is required in terms of Section 26 B” of the Skills Development Act.

The NAMB will utilize the titles, descriptors, alternate titles, and tasks from the prevailing version of the OFO as the basis to determine which occupations are trades and can be listed by the Minister.

Criteria that will be utilized by NAMB to classify occupations as Trades.

The occupational titles, descriptors, alternate titles, and tasks will be compared to the following broad generic description of a trade:

An occupation where in a qualified person applies a high level of practical skills supported and re-enforced by underpinning and applied knowledge to:

- Manufacture, produce, service, install or maintain tangible goods, products or equipment in an engineering and/or technical work environment (*excluding process controllers and operators*).
- Uses tools and equipment to perform of his/her duties.
- Measure and do fault finding on process, manufacturing, production and/or technical machinery and equipment to apply corrective or repair actions.
- Apply and adhere to all relevant health, safety and environmental legislation.
- Has an accumulative learning period covering knowledge, practical and workplace learning that is equivalent to three or more years.

The route to achieve artisan status will also be considered as such a route is uniquely characteristic of a trade and usually includes features such as:

- ◊ a structured learning programme of knowledge, practical and work experience
- ◊ a structured learning programme that must be successfully completed before a final assessment is attempted
- ◊ a final external summative assessment that must be passed and is known as a trade test.

Historic and global classification of occupations as trades will also be considered.

Any occupation that is determined by NAMB to align to the above criteria will be endorsed for classification as a trade.
